## CITY COUNCIL WILL POSTPONE NEXT MEETING

Action Necessary Account of Unfinished Condition of Papers

Owing to the stress of business which has prevented the completion of a number of agreements which should be acted upon this week, there will be no session of the city council tomorrow night, this meeting having been postponed until Friday night.

The city fathers, acting as a city board of equalization, have been very busy for the past few days, winding up the equalization work and preparing for their final report. This report will be ready for Friday night, it is understood.

In addition, the contract between the city and the Gila Valley railway, relative to the exchange of ground north of Bankers' garden has not been completed as yet. This agreement is now being drawn up and will, in all probability, be ratified at Friday night's session.

By this agreement, the city will receive the right of way along the west side of Pinal creek, now used by the Gila Valley railway, giving in exchange a portion of the original North Broad street on the opposite side of the creek, together with permission to the railroad company to construct a steel bridge across Broad street at Bankers and also the right to change its grades on Pine street.

It is possible that work on the new steel viaduct will be commenced within a short time, as the railroad officials are anxious to have the contract with the city ratified at once.

In addition, a report is expected from the city attorney as to whether this city has the right to use a balance of about \$4,000 which remains in the old North Globe township fund, for the improvement of the business district.

If it is found that this money may be utilized for that purpose, about \$1,500 will be put into a new footbridge across Pinal creek on the east side of North Broad.

Several other matters will also come up for consideration and as the result, Friday night's session will be a scene of much activity.
